

**Looking for a  
fun, easy and  
educational  
event for your  
cub group?**

**FUN !**

**is offering a free 1 hour  
program...**

...for Cub groups in the Calgary  
area, to teach your group  
about computers.

René Sloos, president of  
CompuConsult and a Microsoft  
Certified Trainer uses his skills  
to teach kids about the  
fundamentals of computers.

This program fulfills the  
requirements for the Cubs  
Computer Badge. We will even  
supply the certificates and  
badges!

Suite 202 - 621 4th Avenue SW  
Calgary, Alberta, T2P 0K2  
[www.CompuConsult.com](http://www.CompuConsult.com)

## EDUCATIONAL !

The following is an overview of our program:

- What is a computer?
- What kind of devices does a computer have?
- Picture match exercise
- What's inside a computer?
- What's the difference between a floppy disk and a hard disk?
- How are computers used in business?
- How are computers used in education?
- How are computers used in entertainment?
- Let's create a Web page!
- Are computers stupid or smart?

We need a "classroom" setup with tables and chairs for the participants. We will bring a projector, a screen, speakers and a computer controlled stage light for the demonstrations. Please give us a list of names before the event to prepare the certificates.

**EASY !**

### **What people say (1):**

Thank you for taking the time to help our Cubs earn their computer badge. What a great program! Not only is it educational, informative and hands on (loved getting to hold the insides of a computer) but fun too.

The kids (and leaders) all went home a little wiser and for the Cubs a little prouder. Having you come to us gave the Cubs the opportunity to really shine and the leaders the opportunity to sit back and let them do so.

**Darzee - Claire Stott, 243  
Tuscany cubs**

## **What people say (2):**

René has a real passion for computers and he has used this passion to create a unique presentation tailored to the requirements for the Cub Computer Badge. René made material that would otherwise seem boring to kids, come alive by using matching games and hands on displays to teach the parts of the computer. He had kids jumping out of their seats to answer questions about music mixing and computer graphics.

In my son's opinion, the best part of the presentation was when René programmed a holographic image to change shape, color and move around the room. René kept 25 kids and 7 leaders mesmerized for an hour with his presentation, and he made the Computer Badge a memorable experience for our Pack. I would highly recommend having René come into your meeting and we will definitely use René again in the future.
